Overview

Confined Space Entrant / Attendant is a PT Samson Tiara certified course designed to provide workers and supervisors with the knowledge and practical skills required when working in confined space environments. The course provides training and certification appropriate for personnel assigned as Confined Space Entrants and Safety Attendants.

The programme covers confined space hazards, equipment, regulations, entry procedures, permit systems, atmospheric hazards, respiratory protection, and actions to be taken during a confined space emergency. Training is delivered through classroom instruction, group discussion, written assessment, and individual and team practical exercises.

Practical exercises are conducted in a confined space simulator using equipment such as portable gas detection systems, tripod and davit access and retrieval systems, communications equipment, respiratory protection equipment, lifelines, lockout equipment, self-rescue systems, ventilation equipment, harnesses, rope-based retrieval systems, SCBA, and supplied air respirator systems.

Medical and physical note: This is a physical training course. Delegates are expected to be in a good state of health and must be able to participate in all physical training requirements.

Who is it For?

This course is intended for personnel who enter, attend, supervise, or support confined space work activities, including:

- Confined Space Entrants
- Confined Space Attendants
- Workers required to enter confined spaces
- Supervisors responsible for confined space activities
- HSE personnel involved in confined space safety
- Personnel supporting permit-controlled confined space work

Course Delivery

The course is delivered over **2 days** at PT Samson Tiara's Cilegon training facility. Training includes classroom sessions, group discussions, written testing, practical exercises, and confined space simulator activities.

Learning Objectives

Upon successful completion of this course, delegates should be deemed competent to work as a Confined Space Entrant or Confined Space Attendant within the scope of the course.

Delegates will develop knowledge and practical capability in:

- Understanding confined space regulations and safe work requirements.
- Recognising physical and atmospheric hazards associated with confined spaces.
- Applying appropriate control measures before and during confined space entry.
- Understanding the duties and responsibilities of Entrants and Attendants.
- Using entry programmes and permit systems.
- Understanding respiratory protection requirements.
- Using confined space entry, communication, retrieval, and personal protective equipment.
- Responding appropriately during a confined space emergency.

Course Content

- Confined Space Regulations
- Physical Hazards and Control Measures
- Duties of Entrants and Attendants
- Respiratory Protection
- Entry Programmes and Permit Systems
- Atmospheric Hazards and Control Measures
- Confined Space Entry and Retrieval Equipment
- Actions During a Confined Space Emergency

Practical Exercises

Practical training exercises are conducted in the confined space simulator using equipment including:

- Portable Gas Detection Systems

- Tripod Access and Retrieval Systems
- Davit Access and Retrieval Systems
- Respiratory Protection Equipment
- Communications Equipment
- Lifelines and Other Personal Protective Equipment
- Lockout Equipment
- Self-Rescue Systems
- Positive Pressure Ventilation Equipment
- Full Body Group E Harness
- Rope-Based Retrieval Systems
- SCBA and SAR Breathing Air Systems

Assessment

Delegates are required to successfully complete written and practical testing in order to receive course certification.

Certificate

Delegates who successfully complete the course and meet the required performance standards will receive:

- PT Samson Tiara Confined Space Entrant / Attendant certificate.
- Laminated wallet course qualification card.
