

CONFINED SPACE ENTRY (CSE)

Duration: 60 minutes

Questions: 20

Price Band: A

Course Outline:

This confined space entry course is suitable for all employees in hazardous industries required to work in confined spaces. On successful completion of this course, candidates will recognise the hazards associated with confined space entry and the precautions that need to be taken when working in a confined space. It provides candidates with the knowledge to perform their duties safely and responsibly.

Learning Objectives:

- L01: Describe a confined space
- L02: Identify examples of confined spaces
- L03: Identify and explain the hazards associated with a confined space
- L04: Identify the different roles and responsibilities for confined space entry
- L05: Describe the regulations associated with confined space entry
- L06: Describe the elements of a risk assessment for confined space entry
- L07: Identify the elements of a safe system of work
- L08: Describe good housekeeping practices for confined space work
- L09: Describe the emergency procedures for confined space work
- L010: Describe rules for entering/working in a confined space
- L011: Describe when and how to exit a confined space
