

ENVIRONMENTAL AWARENESS

Duration: 30 minutes

Questions: 20

Price Band: A

Course Outline:

The purpose of this Environmental Awareness course is to help delegates understand the impact that company activities can have on the environment. Additionally, they will be able to identify their role in reducing the impact that company operations can have on global environmental issues, such as global warming and ozone depletion.

Learning Objectives:

- L01: Give an introduction to environmental management systems and environmental impacts
- L02: Explain what atmospheric emissions
- L03: Explain what discharges to water are
- L04: Explain how the chemicals we use can have an impact on the environment
- L05: Explain how the waste we produce affects the environment
- L06: Explain why it is so important to prevent oil spills
- L07: Explain why and how we use data to manage environmental performance
- L08: Give an understanding of onshore and offshore oil and gas industry interactions with the environment
