

EXCAVATION

Duration: 60 minutes

Questions: 20

Price Band: A

Course Outline:

Excavations can be very dangerous places for personnel in and around the work-site. This course shows candidates how to spot the dangers associated with excavations and what controls are necessary to prevent injury.

Learning Objectives:

- L01: Define what an excavation is.
- L02: Identify the need for an excavation procedure.
- L03: Identify the roles and responsibilities associated with excavations.
- L04: Describe the hazards associated with excavations.
- L05: Describe how to plan an excavation.
- L06: Identify what PPE is required.
- L07: Identify and describe excavation support systems.
- L08: Describe the emergency response arrangements.
- L09: Identify the safety checks required before work can begin within the excavation.
- L010: Identify safety requirements during excavations.
- L011: Describe how to carry out an excavation.
- L012: Describe the backfilling procedure.
