Overview

Floor / Fire Warden is a PT Samson Tiara certified course designed to provide delegates with a theoretical and practical understanding of the typical functions of a fire warden, floor warden, or fire marshal within a workplace.

The course helps delegates understand how fires start and spread within buildings, recognise common workplace fire hazards, support emergency evacuation arrangements, assist with mustering, and understand the basic use of fire extinguishers within the scope of the training.

The programme also introduces selected workplace emergency response considerations, including actions to take during earthquakes, managing bomb threats, and managing flood events. The course includes evaluation and drills.

This course can be customised to the client's workplace needs and delivered on-site, including evacuation drills where required. For a customised course, please contact us for further information.

Who is it For?

This course is suitable for personnel who may be appointed to support workplace fire prevention, evacuation, or emergency coordination duties, including:

- Floor wardens
- Fire wardens
- Fire marshals
- Emergency response team members
- HSE personnel
- Security personnel
- Supervisors and team leaders
- Personnel assigned to support workplace evacuation and mustering arrangements

Course Delivery

The standard course is delivered over **1 day**. Training is available at PT Samson Tiara's Cilegon and Jakarta facilities, or on-site at the client's workplace.

On-site delivery can be customised to the client's workplace, emergency arrangements, and evacuation drill requirements.

Learning Objectives

Upon successful completion of this course, delegates should have a basic understanding of common fire hazards in the workplace, the basic use of fire extinguishers, evacuation techniques, and mustering.

Delegates will develop knowledge and practical understanding in:

- Recognising common workplace fire hazards.
- Understanding basic health and safety rules related to workplace fire prevention.
- Understanding how fires start and propagate within buildings.
- Understanding storage and handling considerations for flammable or explosive materials in the workplace.
- Understanding basic fire extinguishing techniques within the scope of the course.
- Recognising passive and active fire protection systems.
- Understanding the importance of exits, corridors, stairs, helipads, and muster points.
- Supporting emergency evacuation arrangements.
- Understanding procedures to follow in case of fire.
- Understanding basic actions to take during earthquakes, bomb threats, and flood events.

Course Content
