INTERMEDIATE INCIDENT COMMAND SYSTEMS FOR EXPANDING INCIDENTS (ICS 300)

This course provides training and resources for personnel who require advanced application of the Incident Command System. Building on foundational ICS knowledge, it enhances incident command skills and focuses on concepts applicable to individuals directly responsible for emergency response at offshore or onshore company assets requiring offsite IMT support.

Training is delivered in a classroom and ECC environment, with group activities covering the development of the Incident Action Plan (IAP) and the interactions between Command and General Staff sections. Post-exercise debriefs provide immediate feedback on individual and team performance.
