Overview

Permit to Work is a PT Samson Tiara certified course designed for personnel who work in oil, gas, mining, geothermal, petrochemical, and other high-risk industries. The course provides delegates with an understanding of the purpose and application of permit-to-work systems, with emphasis on their use for high-risk activities.

A permit to work is a formal system that defines what work is to be carried out, when it is to be performed, and which parts of the work are safe to proceed. The system requires a responsible person to assess the work, check safety requirements at each stage, and ensure that those undertaking the work understand the hazards, risks, and necessary precautions.

The course also supports managers and responsible personnel in understanding how permit-to-work documentation should be completed, how permit conditions relate to Job Safety Analysis (JSA) and risk assessment, and how compliance with permit requirements should be monitored, recorded, and audited.

Who is it For?

This course is suitable for personnel involved in planning, authorising, supervising, or carrying out high-risk work activities, including:

- Personnel working in oil, gas, mining, geothermal, petrochemical, and other high-risk industries
- Managers responsible for hazardous work activities
- Supervisors responsible for worksite control
- Permit issuers and permit receivers
- HSE personnel
- Operations and maintenance personnel
- Personnel involved in Job Safety Analysis, risk assessment, and permit compliance monitoring

Course Delivery

The standard course is delivered over **1 day**. Training is available at PT Samson Tiara's Cilegon and Jakarta facilities, or on-site at the client's location.

If the course is conducted on-site, the client should provide a classroom or other suitable quiet area with chairs, desks, whiteboard, and overhead projector.

Learning Objectives

Upon completion of this course, delegates will have a competent understanding of the purposes of the permit-to-work system, with emphasis on its use for high-risk activities.

Delegates will develop knowledge and understanding in:

- Recognising when a permit to work is required.
- Understanding roles and responsibilities within the permit-to-work process.
- Understanding communication processes that support the permit system.
- Understanding the relationship between permit-to-work systems, Job Safety Analysis, and risk assessment.
- Monitoring compliance with permit conditions and the JSA / risk assessment.
- Recognising the need to report non-compliances or violations of permit conditions.
- Understanding training and competency requirements related to permit-controlled work.
- Understanding documentation, records, and auditing requirements within the permit-to-work system.

Course Content

- When a Permit to Work Is Required
- Issuing a Permit to Work — Roles and Responsibilities
- Communication Processes to Complement the Permit System
- Job Safety Analysis (JSA)
- Monitoring Compliance with Permit Conditions and the JSA / Risk Assessment
- Reporting Non-Compliances or Violations of Permit Conditions as Required
- Training and Competency
- Documentation, Records, and Auditing

Assessment

Delegates must successfully complete the course based on the required performance standards in order to receive certification.

Certificate

Delegates who successfully complete the course and meet the required performance standards will receive:

- PT Samson Tiara Permit to Work certificate.
