Overview

Scaffolding Awareness is a PT Samson Tiara certified course designed to provide delegates with a fundamental understanding of scaffolding through theoretical knowledge and practical exercises. The course covers scaffolding structures, components, installation, removal, inspection, and safety precautions related to scaffolding and working at height.

The programme introduces delegates to scaffolding standards and regulations, basic construction and scaffolding safety, hazards and risks associated with scaffolding structures, and the prevention measures required during scaffolding installation. It also includes basic scaffolding design and calculation concepts within the scope of the course.

Although titled as an awareness course, the programme includes practical exercises covering general scaffolding knowledge, scaffolding parts, basic installation, maintenance, removal, inspection, safety procedures, and scaffolding design and installation practice.

Who is it For?

This course is suitable for personnel who require a fundamental understanding of scaffolding, working at height, and scaffolding safety, including:

- Personnel who work around scaffolding structures
- Personnel involved in scaffolding-related activities
- Supervisors overseeing work involving scaffolding
- HSE personnel
- Maintenance and construction personnel
- Personnel who need basic knowledge of scaffolding components, installation, inspection, and safety procedures

Course Delivery

The course is delivered over **2 days** through face-to-face training. Training is available at PT Samson Tiara's Cilegon and Jakarta facilities, or as an in-house programme.

Training includes theoretical instruction, practical exercises, review, and closing.

Learning Objectives

Upon completion of the course, delegates will be able to:

- Gain knowledge of scaffolding standards and regulations.
- Understand basic construction and scaffolding safety.
- Identify hazards and implement risk prevention measures during scaffolding installation.
- Acquire fundamental knowledge of scaffolding components and structures.
- Understand the processes of scaffolding installation and removal.
- Understand the basics of scaffolding design and calculation.

Course Content

- Basic Knowledge of Working at Height and Scaffolding
- Regulations and Standards Related to Scaffolding
- Hazards and Risks of Scaffolding Structures
- Types of Scaffolding and Their Parts
- Scaffolding Basic Design and Calculation
- Practice: General Knowledge of Scaffolding and Its Parts
- Scaffolding Basic Installation
- Maintenance and Removal of Scaffolding
- Scaffolding Inspection
- Safety Procedures for Scaffolding Installation
- Practice: Scaffolding Design and Installation
- General Review and Closing

Assessment

Delegates must successfully complete the course based on the required performance standards in order to receive certification.

Certificate

Delegates who successfully complete the course and meet the required performance standards will receive:

- PT Samson Tiara Scaffolding Awareness certificate.
