

SCAFFOLD SAFETY AWARENESS (OSHA)

Duration: 60 minutes

Questions: 5

Price Band: A

Course Outline:

The aim of this course is to give you an awareness of scaffolding components and procedures. You will learn about the basic tools used to construct scaffolds, the personal protective equipment required, the roles and responsibilities associated with scaffolding work, and the importance of inspections.

Learning Objectives:

- LO1: Describe what a scaffold is and why it is used
- LO2: Define the key terms used in the construction of scaffolds
- LO3: Recognize the basic components of a scaffold
- LO4: Describe the key elements of a scaffold
- LO5: Identify the different types of scaffolding structures
- LO6: List the basic tools used in the construction of a scaffold
- LO7: List the requirements for access to scaffolds
- LO8: Identify hazards associated with the use of scaffolding
- LO9: Describe the PPE requirements for scaffolding
- LO10: Identify the responsibilities of key personnel involved with scaffolding
- LO11: Describe the use of the scafftags system
- LO12: Describe the importance of scaffold inspections
