

WATER MANAGEMENT - DOSING, SAMPLING, CLEANING AND MAINTENANCE

Duration: 30 minutes

Questions: 10

Price Band: A

Course Outline:

This course is aimed at 2nd Engineers, Chief Officers, Medics or similar. This module – Sample, Dosing, Cleaning and Maintenance – is part of a comprehensive Water Management programme. There are four modules in total which can also be completed separately by job role. This module will guide candidates through how to correctly dose potable water, conducting sampling of potable water through various methods and the cleaning and maintenance methods required to reduce hazards.

Learning Objectives:

- LO1: Describe how to correctly dose potable water with disinfectant
- LO2: Describe how to conduct potable water sampling to reduce potable water hazards
- LO3: Describe the cleaning and maintenance of a potable water system to reduce potable water hazards
- LO4: Describe the additional control measures employed to reduce potable water hazards
