

WATER MANAGEMENT - MONITORING, TROUBLESHOOTING, REPORTING AND DOCS

Duration: 30 minutes

Questions: 10

Price Band: A

Course Outline:

This course is aimed at Chief Engineers, Masters, 2nd Engineers, Chief Officers or similar. This module – Monitoring, Troubleshooting, Reporting & Documentation – is part of a comprehensive Water Management programme. There are four modules in total which can also be completed separately by job role. This module provides candidates with a clear understanding of the monitoring regimes and troubleshooting methods relevant to potable water, reporting requirements and an understanding of the necessary documents.

Learning Objectives:

LO1: Describe the trouble shooting methods for testing potable water

LO2: Identify the documentation used, the reporting requirements and the process to follow for recording information
