

FIRST AID & BLOODBORNE PATHOGENS AWARENESS (OSHA)

Duration: 45 minutes

Questions: 10

Price Band: A

Course Outline:

Employees must know how to respond properly when an accident or injury occurs in the workplace. Exposure to bloodborne pathogens is a serious concern in responding to injury because these microorganisms can cause disease.

Understanding and following basic first aid and emergency action steps helps to minimize threats to life and health.

Learning Objectives:

- LO1: Explain the steps to take to provide care
- LO2: Describe how to carry out CPR
- LO3: Identify the steps to take after an electrical shock
- LO4: Describe the steps to take following a head trauma
- LO5: Explain the steps to take following a fracture
- LO6: Identify the steps to take following a burn injury
- LO7: Explain the steps to take if someone is choking
- LO8: Identify the steps to take following a puncture wound
- LO9: Describe the steps to take following a cut or scrape
- LO10: Describe an 'emergency' and the steps to take in an emergency
- LO11: Describe bloodborne pathogens and how they can be controlled
- LO12: Identify who is at risk and how exposure and transmission occur
- LO13: Describe the purpose of an exposure control plan
- LO14: Identify how to control occupational risk
- LO15: Describe the steps to take if exposure occurs
