

HELICOPTER SAFETY

Duration: 15 minutes

Questions: 6

Price Band: A

Course Outline:

Helicopter safety has a good record in the UK, but accidents and fatalities still occur. As helicopters operate in often harsh conditions, particularly in the North Sea, safety is a top priority. Therefore, strict laws and regulations are in place.

Learning Objectives:

- LO1: Understand how aviation is regulated
- LO2: Describe helicopter systems and equipment
- LO3: Describe the basics of aircraft maintenance and inspections
- LO4: Describe the different types of aircraft crew, their qualifications and training
- LO5: Understand a passenger's role in helicopter safety
